

DevOps para pessoas sem ferramentas

Zandler Oliveira

It's DevOps!

It's DevOps!

It's DevOps!

It's DevOps!

Deployment principles

No down time

Fully automated

Joint ownership between engineering and ops

Decoupled services: clear contracts

Feature flags

Feature flags

Decouples engineering and marketing

Control exposure

Granular

Controlled via PowerShell

Supports early feedback, experimentation

Conferences, launches

Manage the full stack

Monitor/Learn	Telemetry	Application Insights
	Diagnostics	Application Insights
	Performance	Application Insights
Approve	Notify Approvers	Release Management
	Notify Approvers	Release Management
Test	Manual Tests	Microsoft Test Manager
	Automated Tests	Coded UI, Web, Load
	Create Test Data	BacPac with SSDT
App	Configure Application	Tokenization
	Install Application	NuGet, WebDeploy, etc
Infra	Configure Environment	Desired State Configuration
	Provision Environment	Azure Resource Manager
Plan	Tracking Work	TFS / VSTS
	Planning Work	TFS / VSTS

This graphic shows OSS and partner products that are integrated with the Microsoft DevOps solution

List of DevOps Practices

- Infrastructure as Code (IaC)
- Continuous Integration
- Automated Testing
- Continuous Deployment
- Release Management
- App Performance Monitoring
- Load Testing & Auto-Scale
- Availability Monitoring
- Capacity Management
- Change/Configuration Management
- Feature Flags
- Automated Environment De-Provisioning
- Self Service Environments
- Automated Recovery (Rollback & Roll-Forward)
- Hypothesis Driven Development
 - Testing in Production
 - Fault Injection
 - Usage Monitoring / User Telemetry

DevOps

1 Plan

4 Monitor + Learn

Development

Production

2 Develop + Test

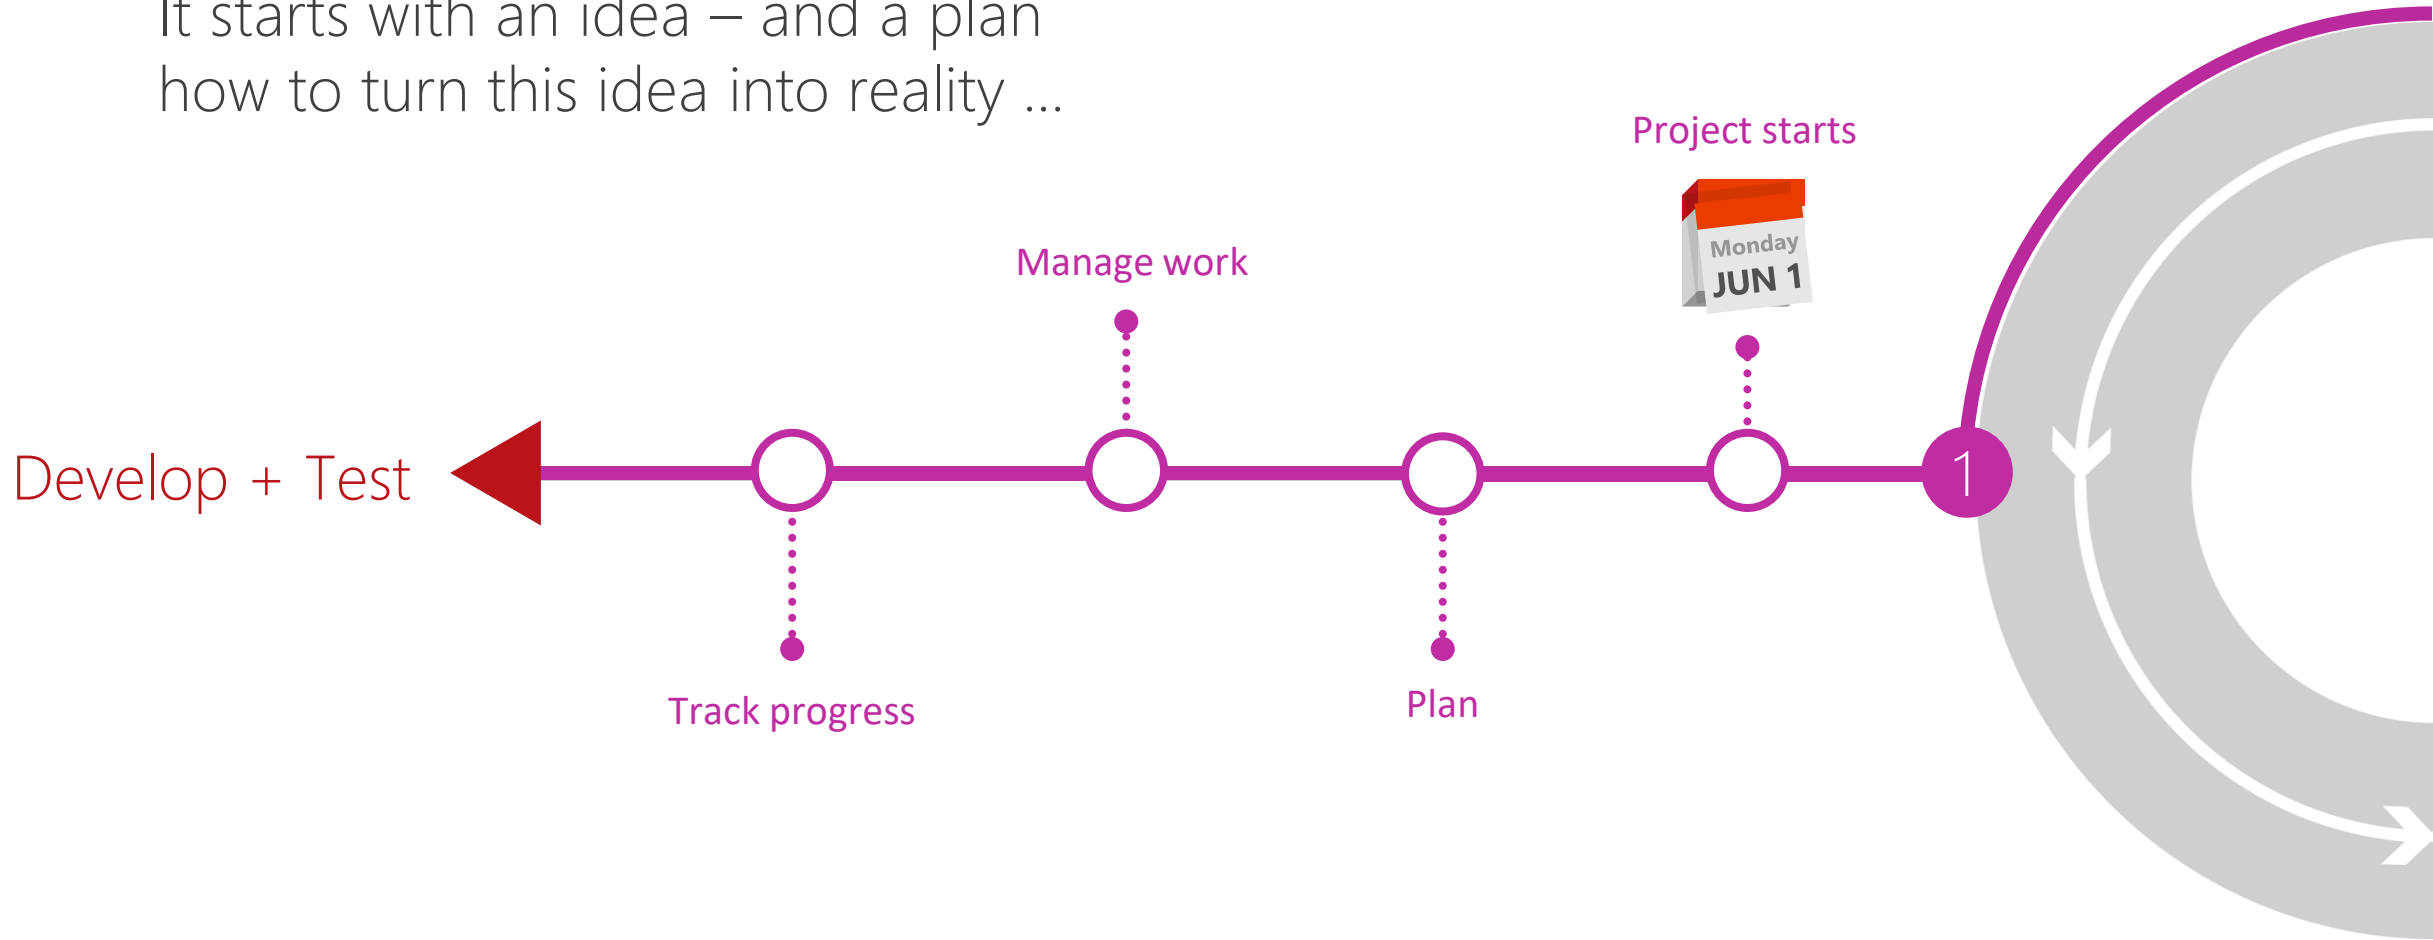

3 Release

Plan

It starts with an idea – and a plan how to turn this idea into reality ...

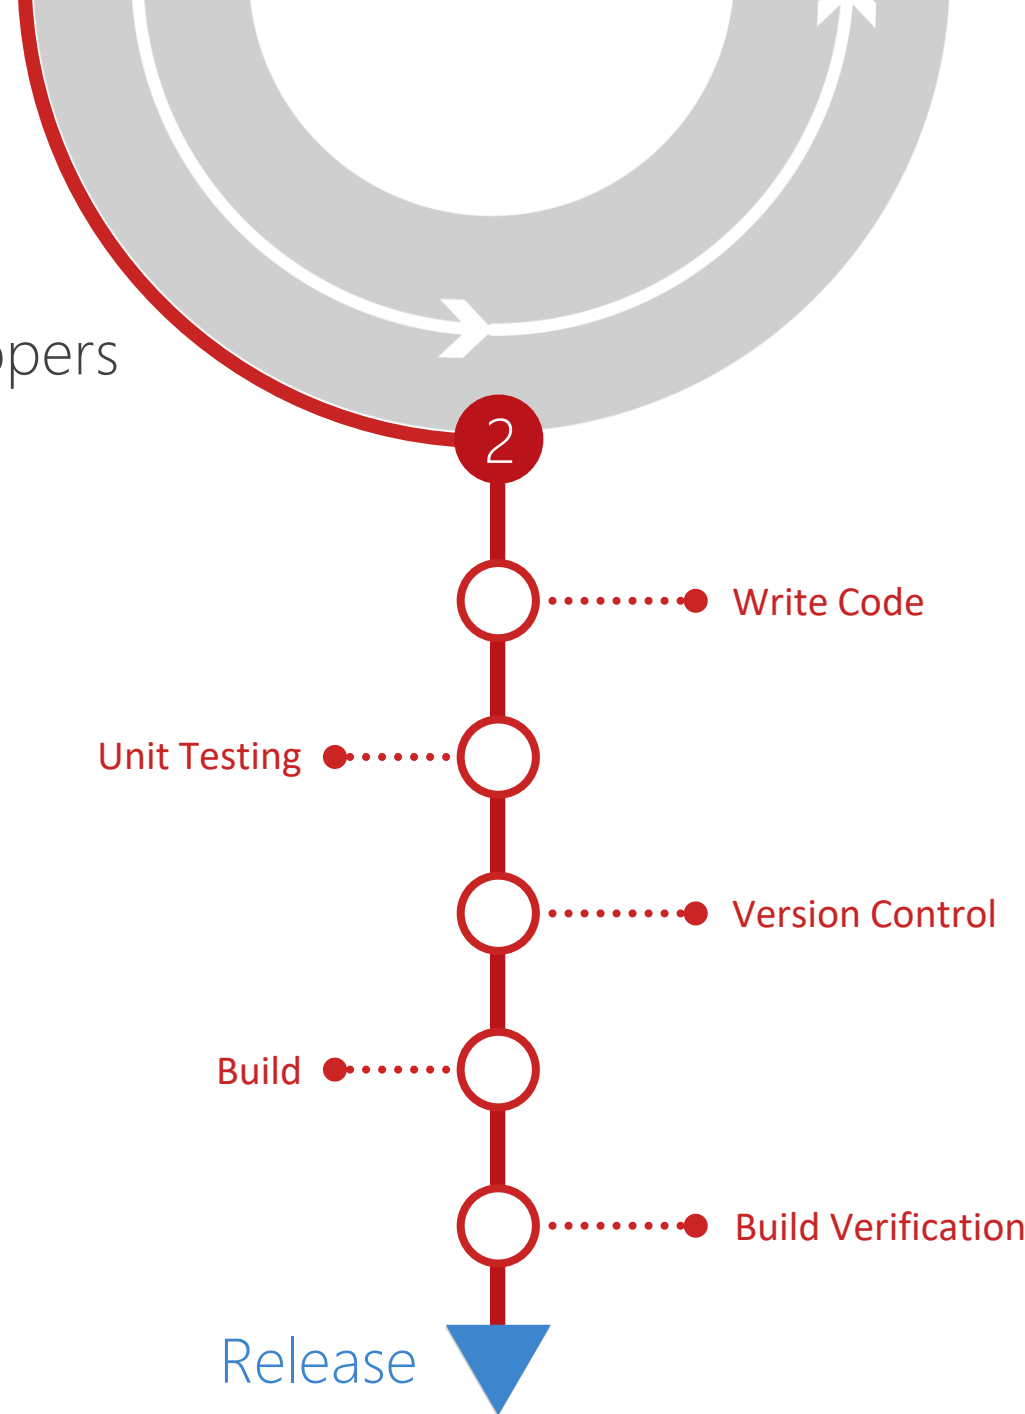

Kanban

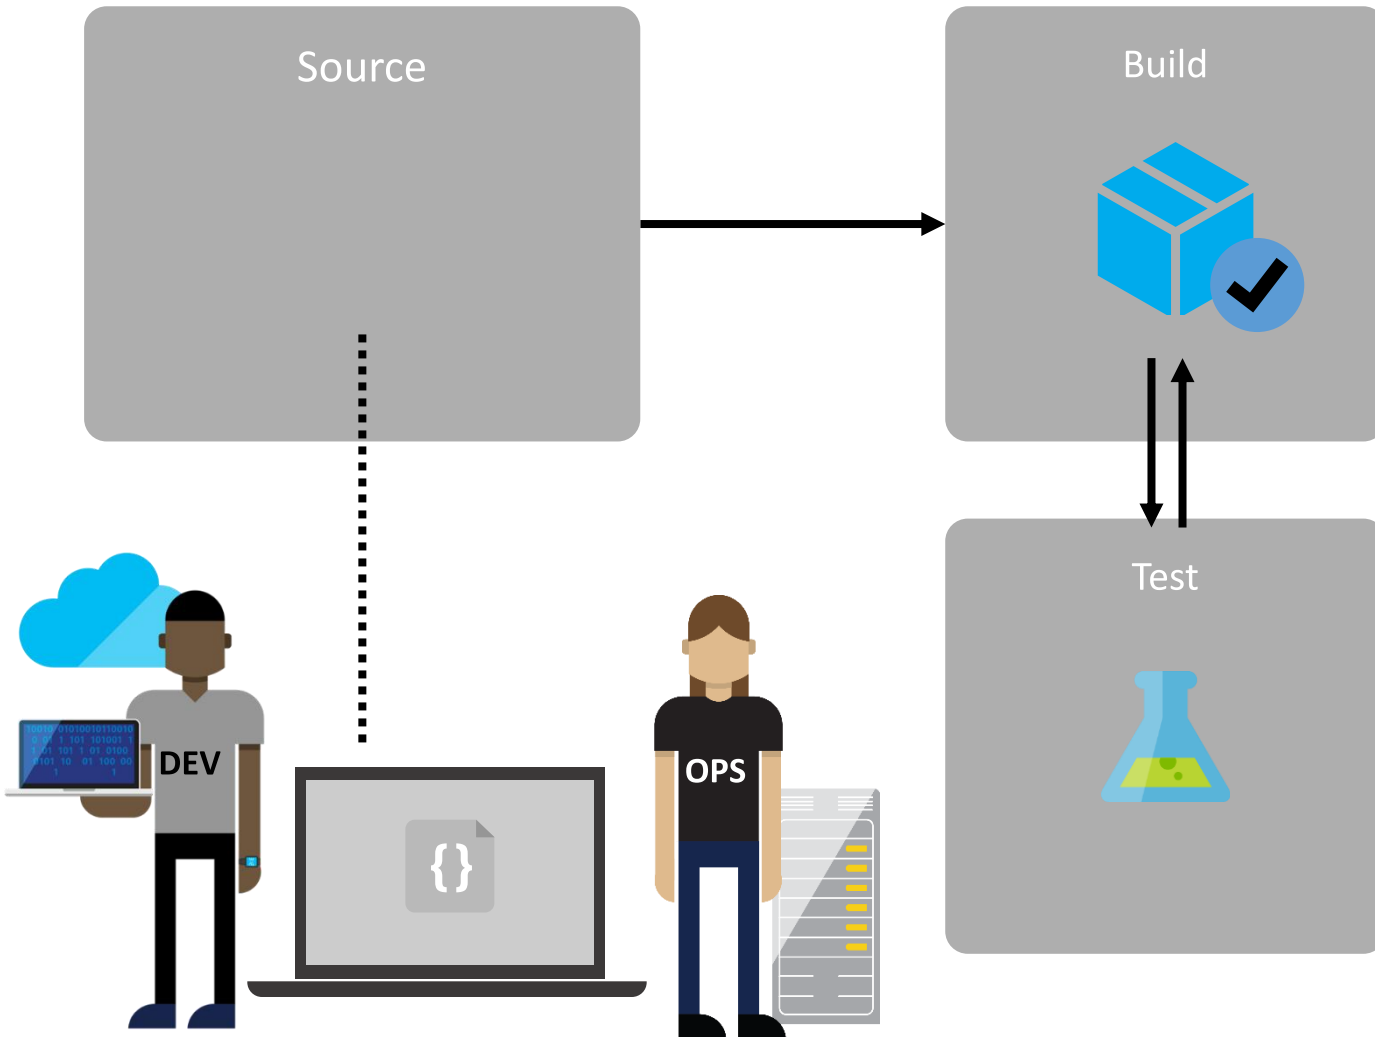

Develop + Test

Once the iteration starts, developers turn great ideas into features ...

Continuous Integration

Value

- Accelerate Delivery
- Repeatability
- Optimized Resources

Measure

- More frequent releases
- MTTR
- MTTD

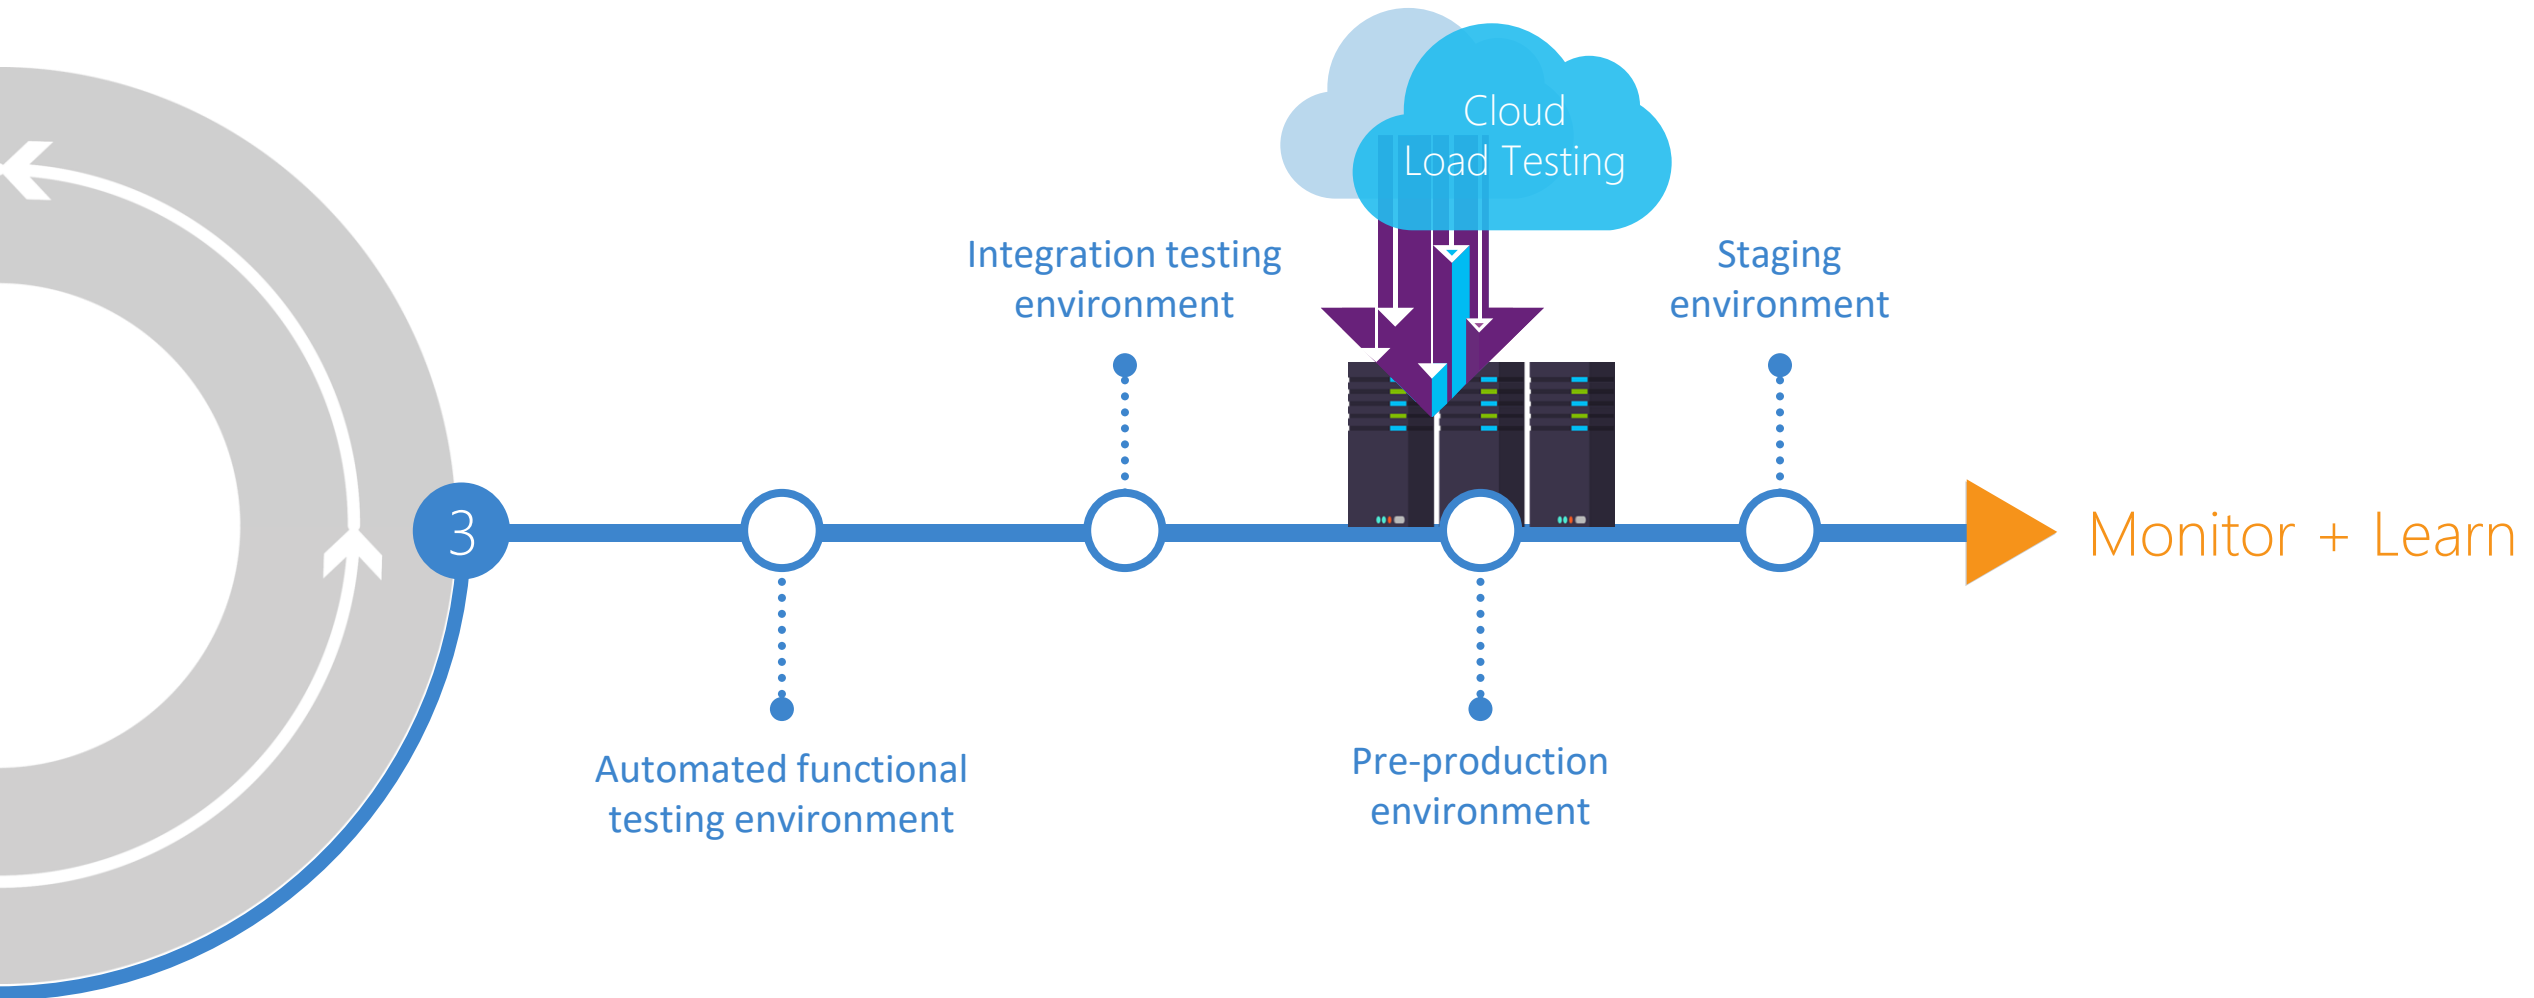

Continuous Integration

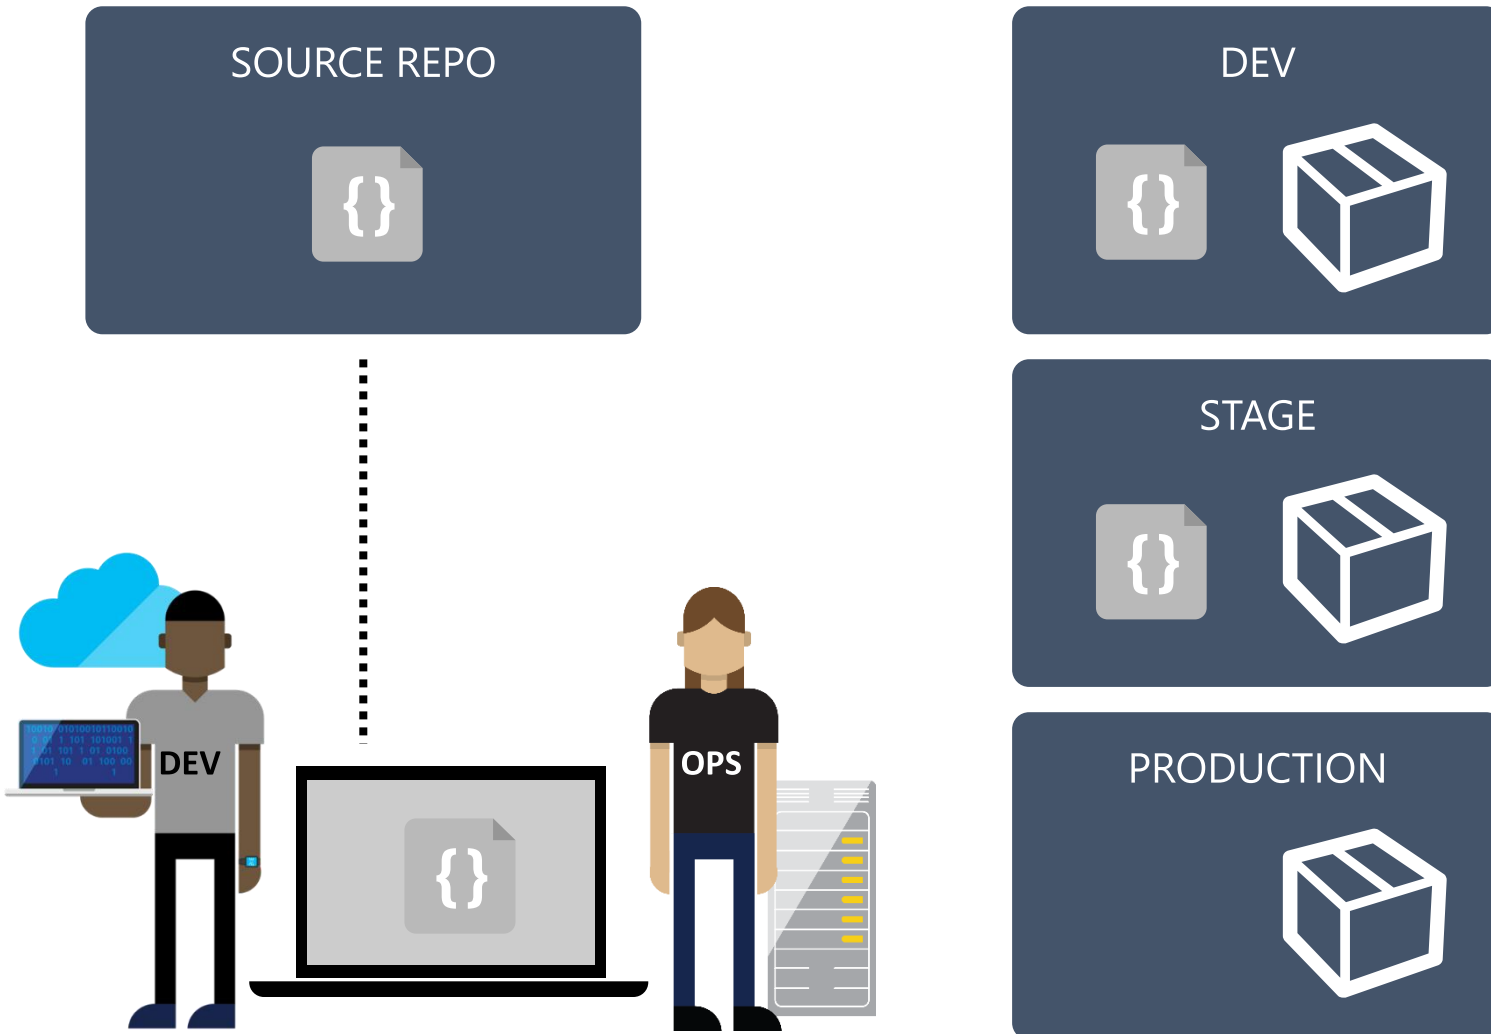

Release

When all tests pass, the build is deployed to testing environments for each stage in the release process

Release Management

Value

- Optimized Resources
- Accelerate Delivery

Measure

- Deployment Rate
- MTTR
- Availability

Continuous Deployment & Release Management

Monitor + Learn

Learn and understand how users use your app, how it reacts and quickly fix issues and bugs

Monitor and Learn
