WHERE?

Onde o NuttX é usado?

Quais micros o NuttX suporta?

The ARM logo is displayed in a white rectangular box. It consists of the lowercase letters 'arm' in a bold, blue, sans-serif font.The AVR logo is shown in a bold, black, sans-serif font with a registered trademark symbol (®) to the upper right of the 'R'.The Z80 logo features the characters 'Z80' in a bold, grey, sans-serif font. The characters are layered with horizontal stripes in red, green, yellow, and cyan, creating a 3D effect.The RISC-V logo includes a stylized 'R' symbol composed of a blue square and a yellow triangle, positioned above the text 'RISC-V' in a blue, sans-serif font.The Xtensa logo is presented in a white rectangular box with the word 'Xtensa' written in a black, sans-serif font.The MIPS logo is shown in a white rectangular box with the word 'MIPS' in a blue, sans-serif font.

Quais micros com melhor suporte?

Como começar a usar NuttX?

- NuttX Channel:
 - www.youtube.com/c/NuttXChannel
- Lista de sites com tutoriais:
 - <http://nuttx.org/doku.php?id=wiki:getting-started>
- Leia os vários README.txt dentro do NuttX;
- Inscreva-se na lista de discussão:
 - <https://groups.google.com/forum/#!forum/nuttx>

Como contribuir?

- Contribua com documentação e tutoriais;
- Comece lendo o código fonte: você consegue! ;
- Tente implementar drivers fáceis: sensores, etc;
- Pesquise pelas mensagens de erro;
- Peça ajuda na lista de discussão;
- Siga à risca o estilo do código fonte do NuttX:
<http://nuttx.org/doku.php?id=documentation:codingstandard>
- Envie seu patch ou dê um PR no bitbucket;
- Bem-vindo ao time! ;-)
