

SAFE ZONES

ACHIEVING BUSINESS AGILITY THROUGH SAFE ZONES IN THE TRANSFORMATION JOURNEY

SAMUEL CRESCÊNCIO

@SCRESCENCIO

Lean it 
HIGHWAY TO BUSINESS AGILITY

SHARING A

A REAL LIFE STORY

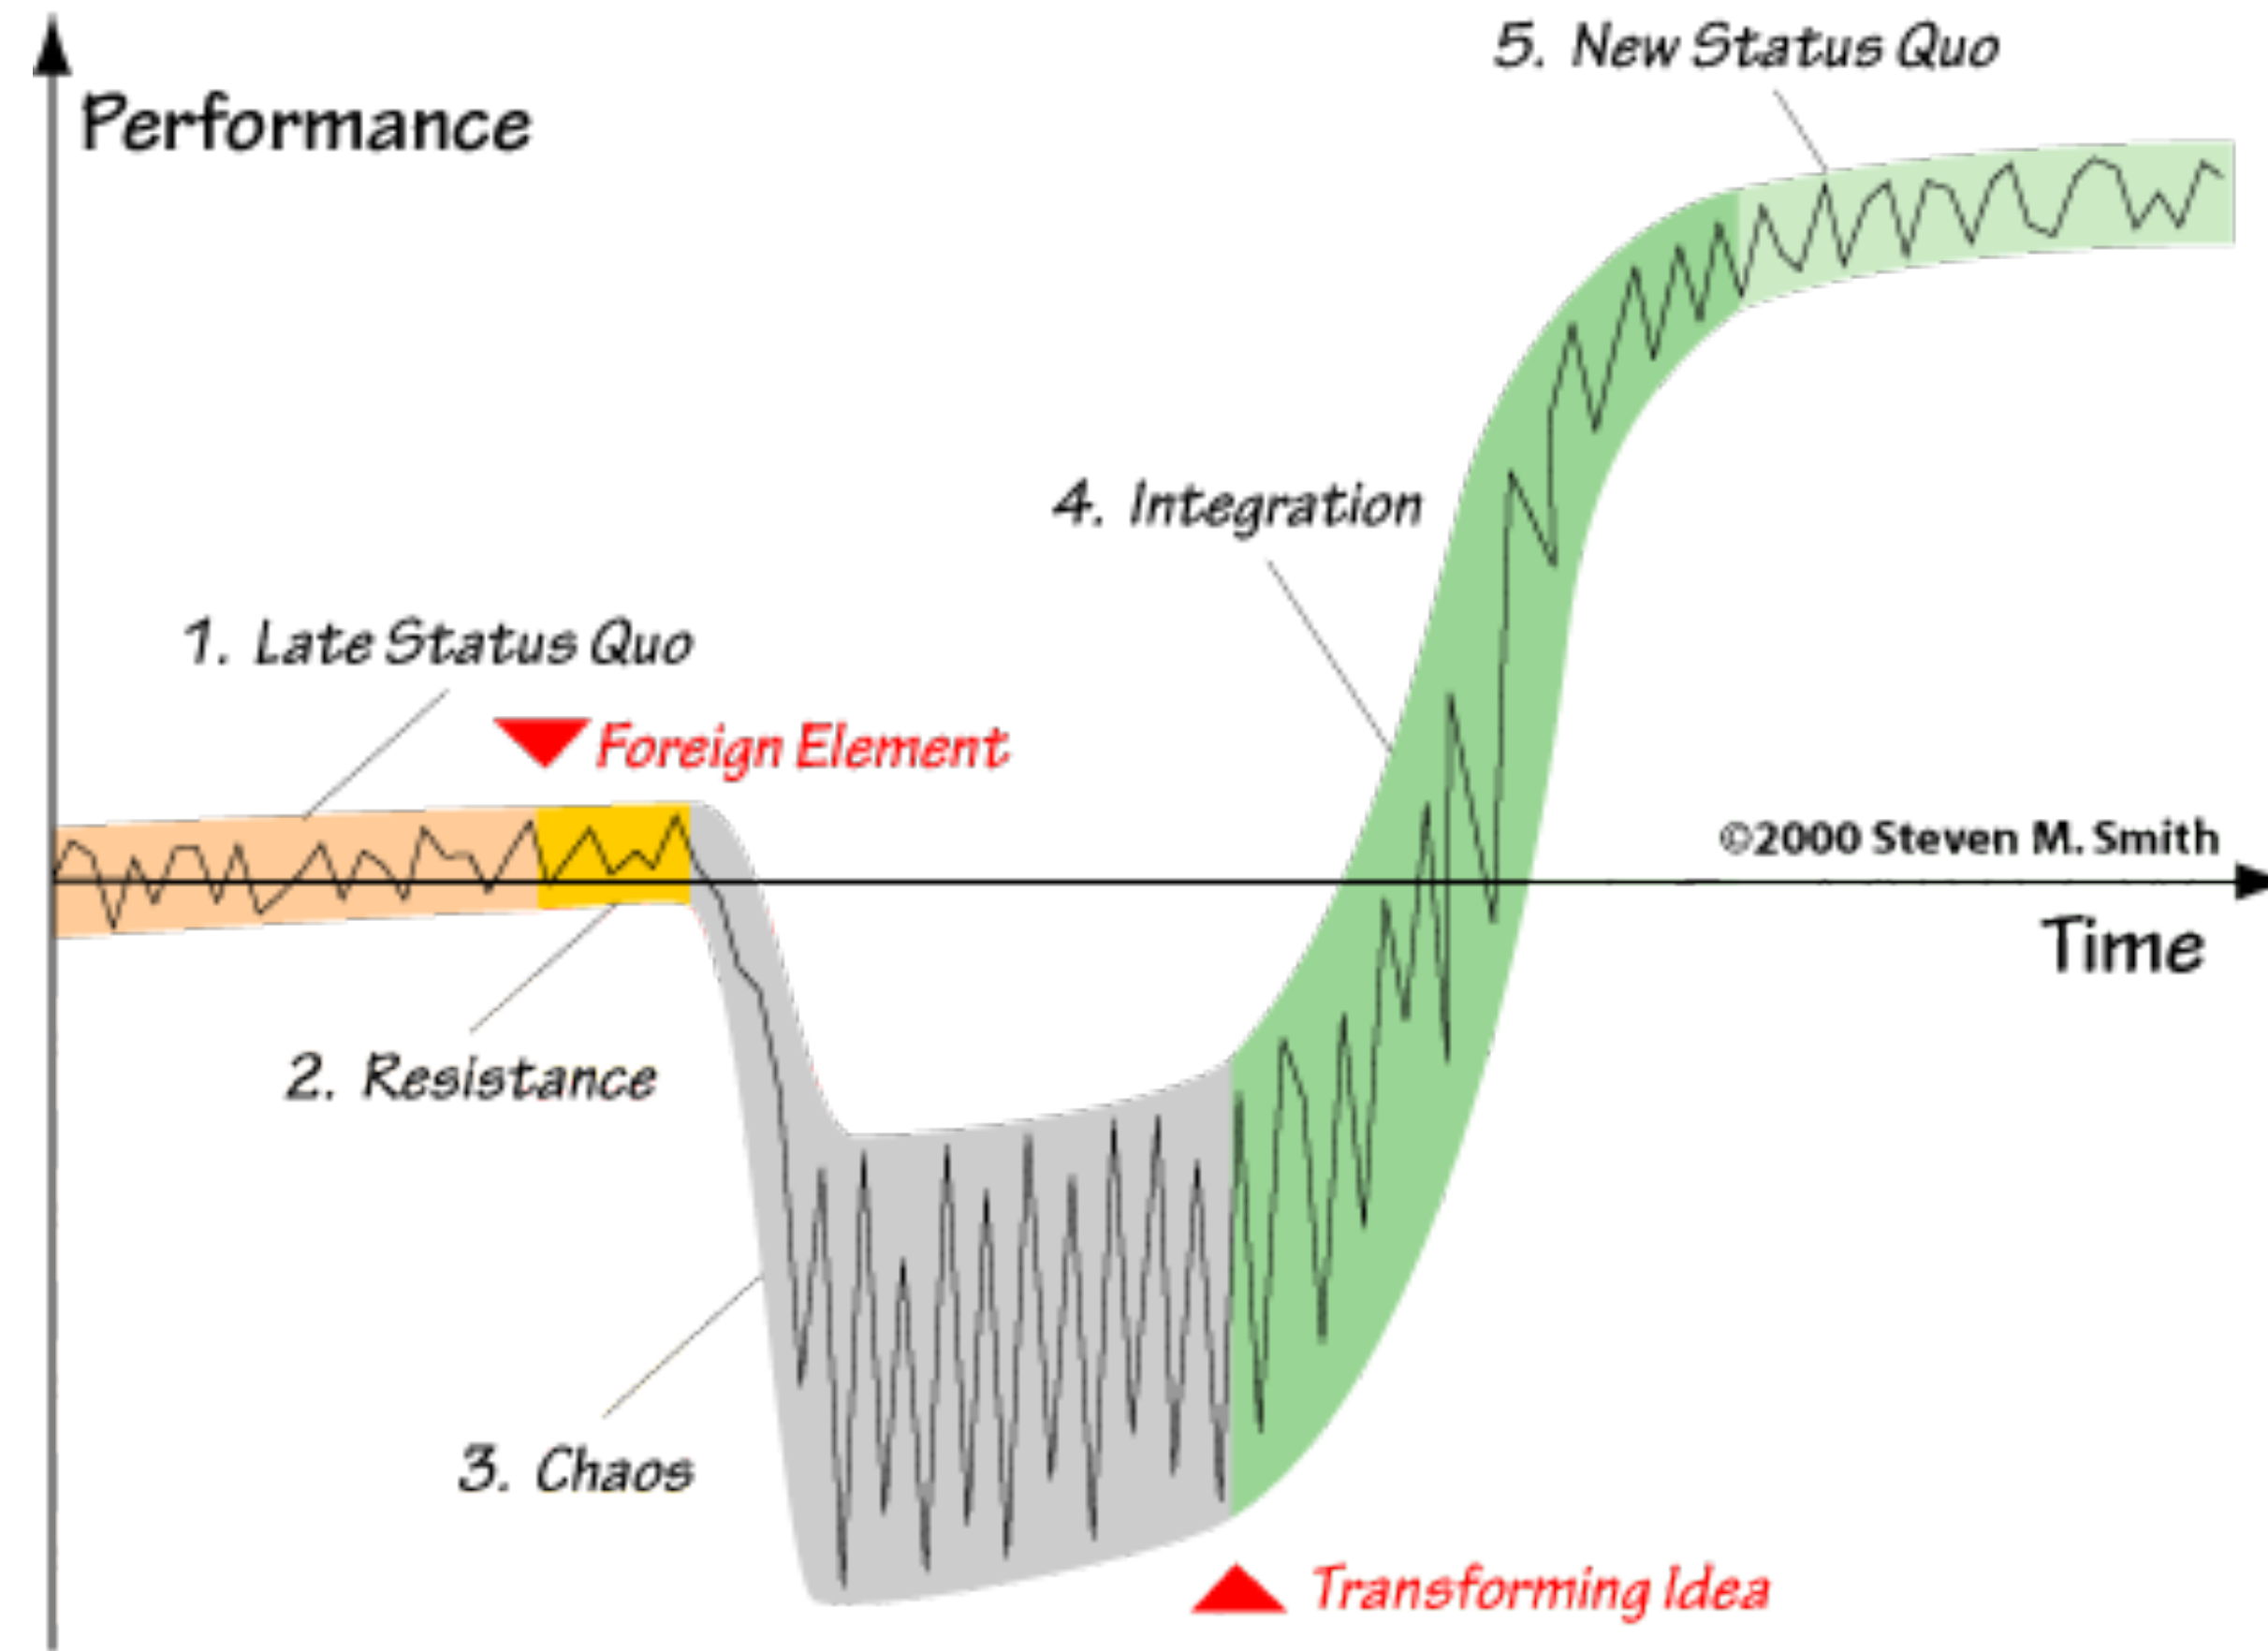

HIGH PERFORMANCE REQUIRES SAFETY

ACHIEVING BUSINESS AGILITY THROUGH
SAFE ZONES IN THE TRANSFORMATION JOURNEY

THE TRANSFORMATION JOURNEY

WHERE TO START?

J CURVE OF CHANGE

KEN BLANCHARD

SITUATIONAL LEADERSHIP MODEL

THE SITUATIONAL LEADERSHIP® II MODEL

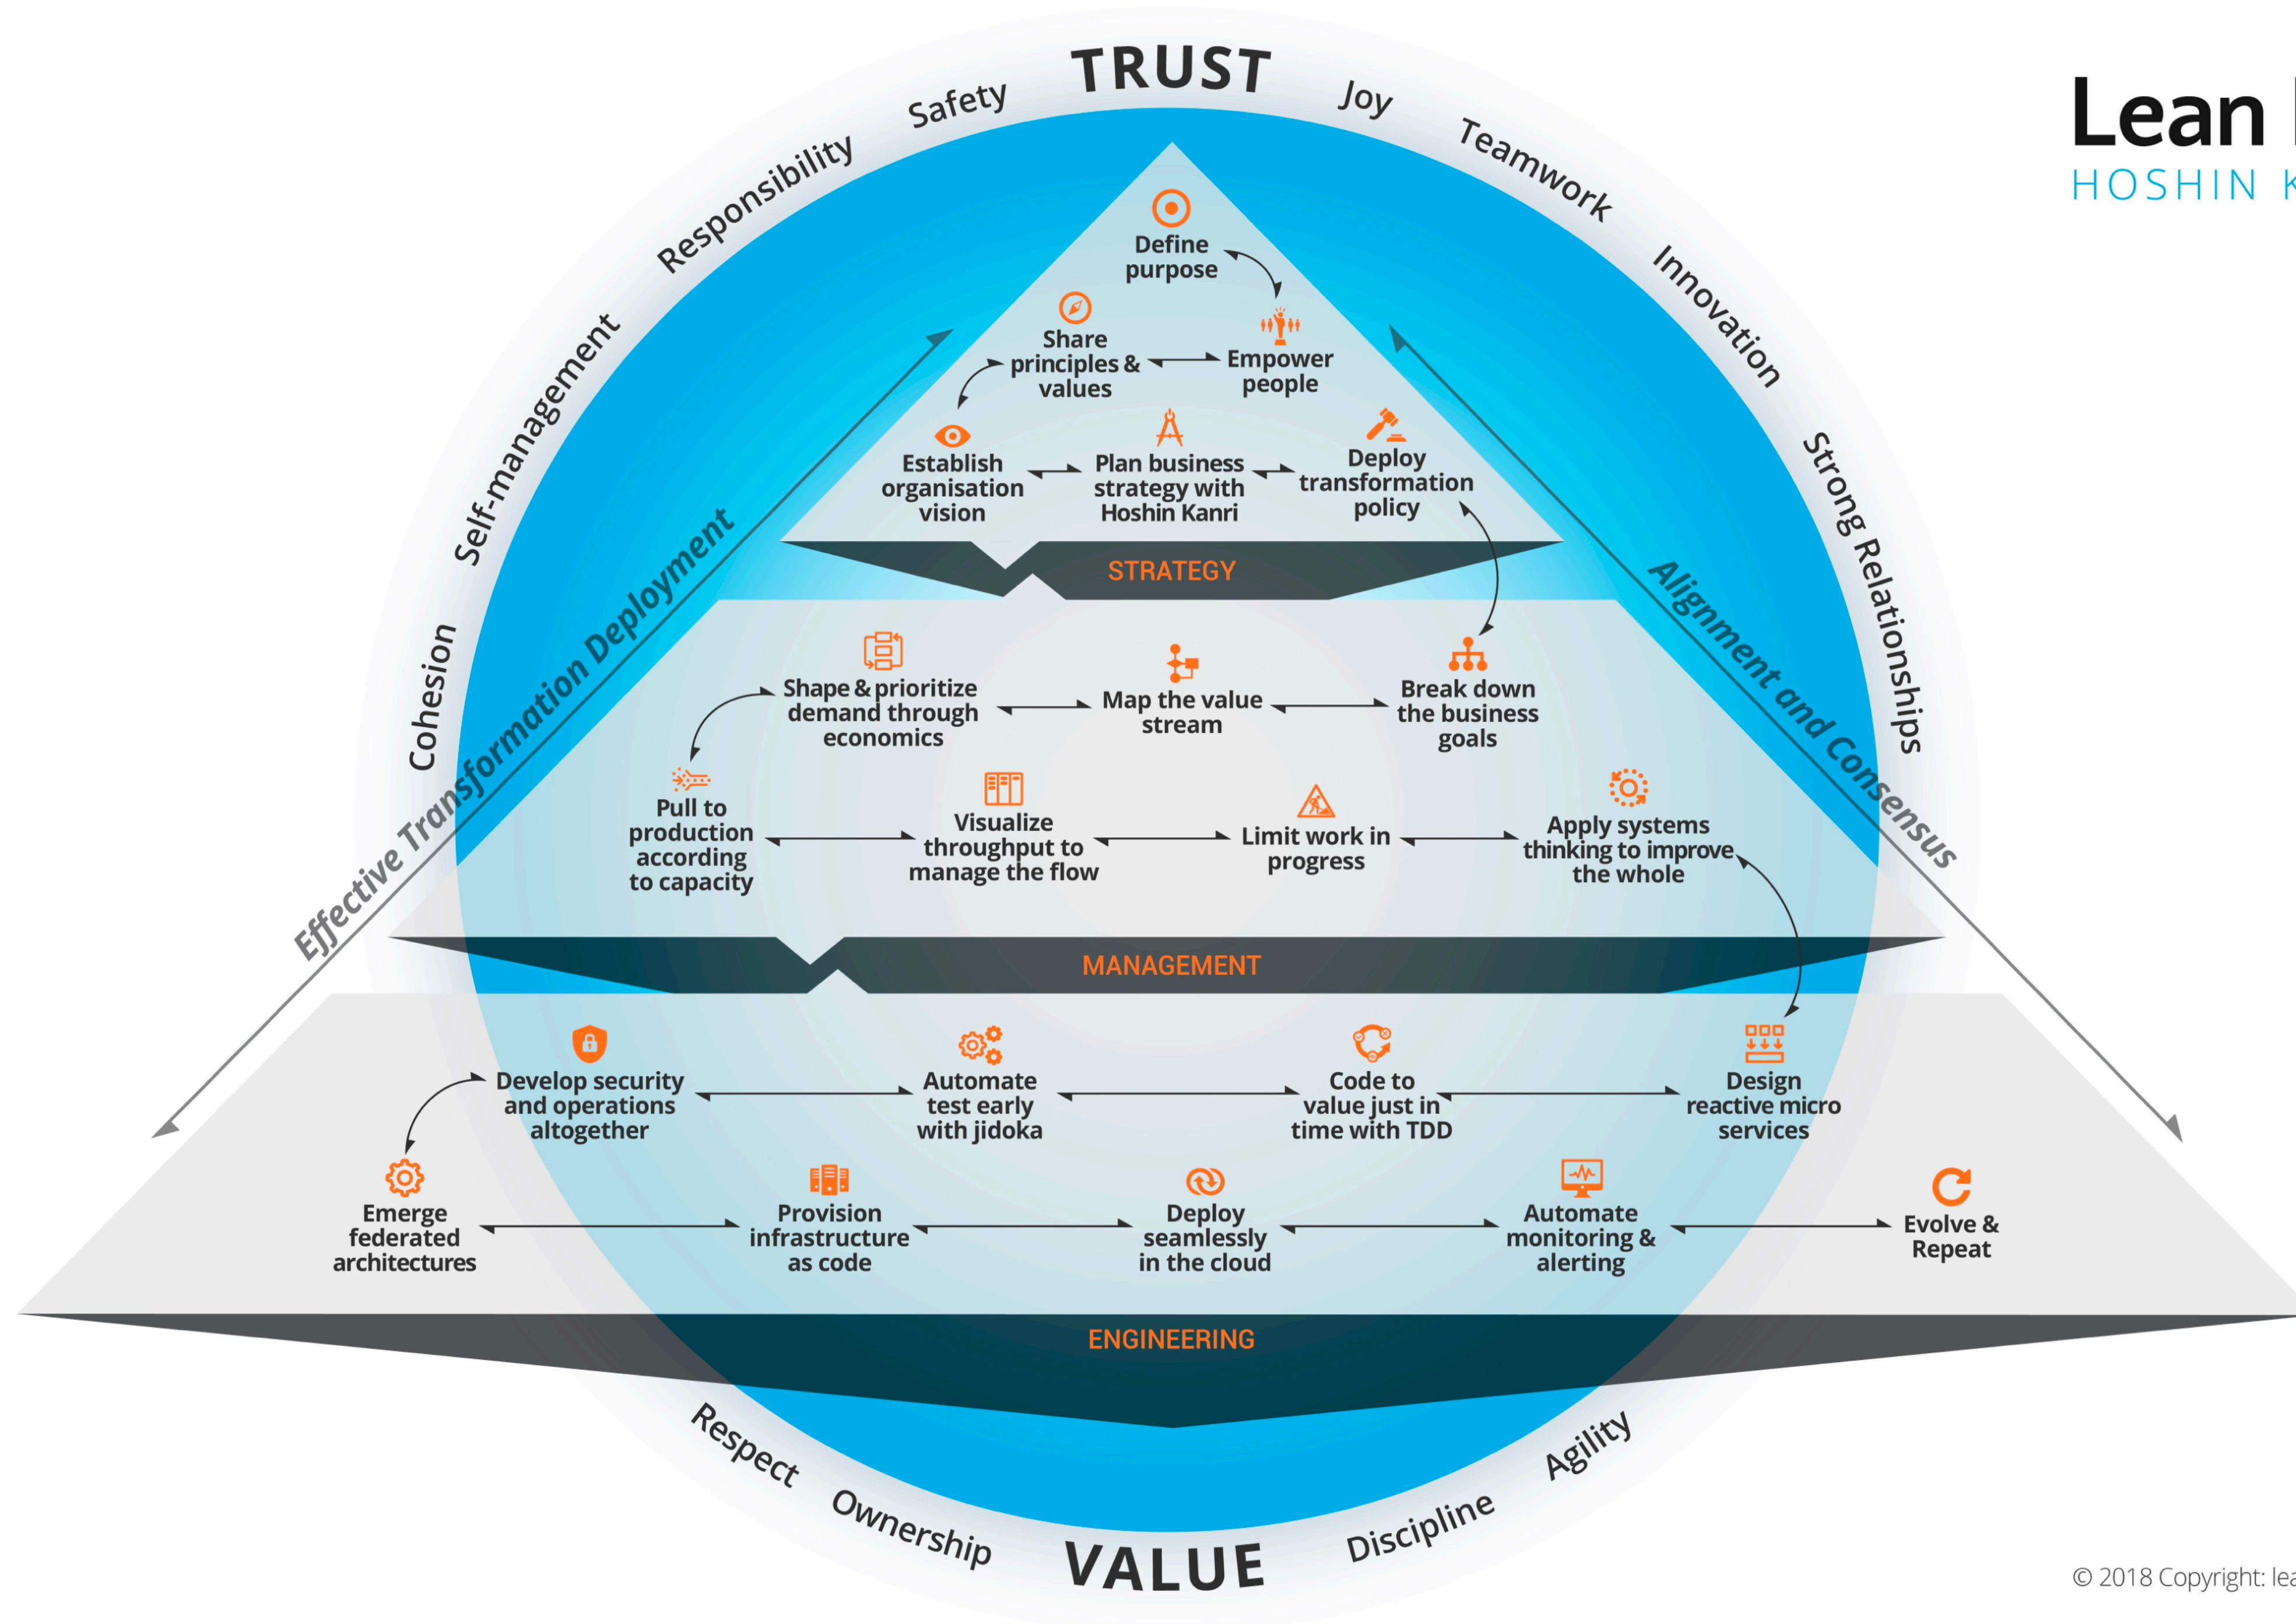

DEVELOPED ←———— DEVELOPING

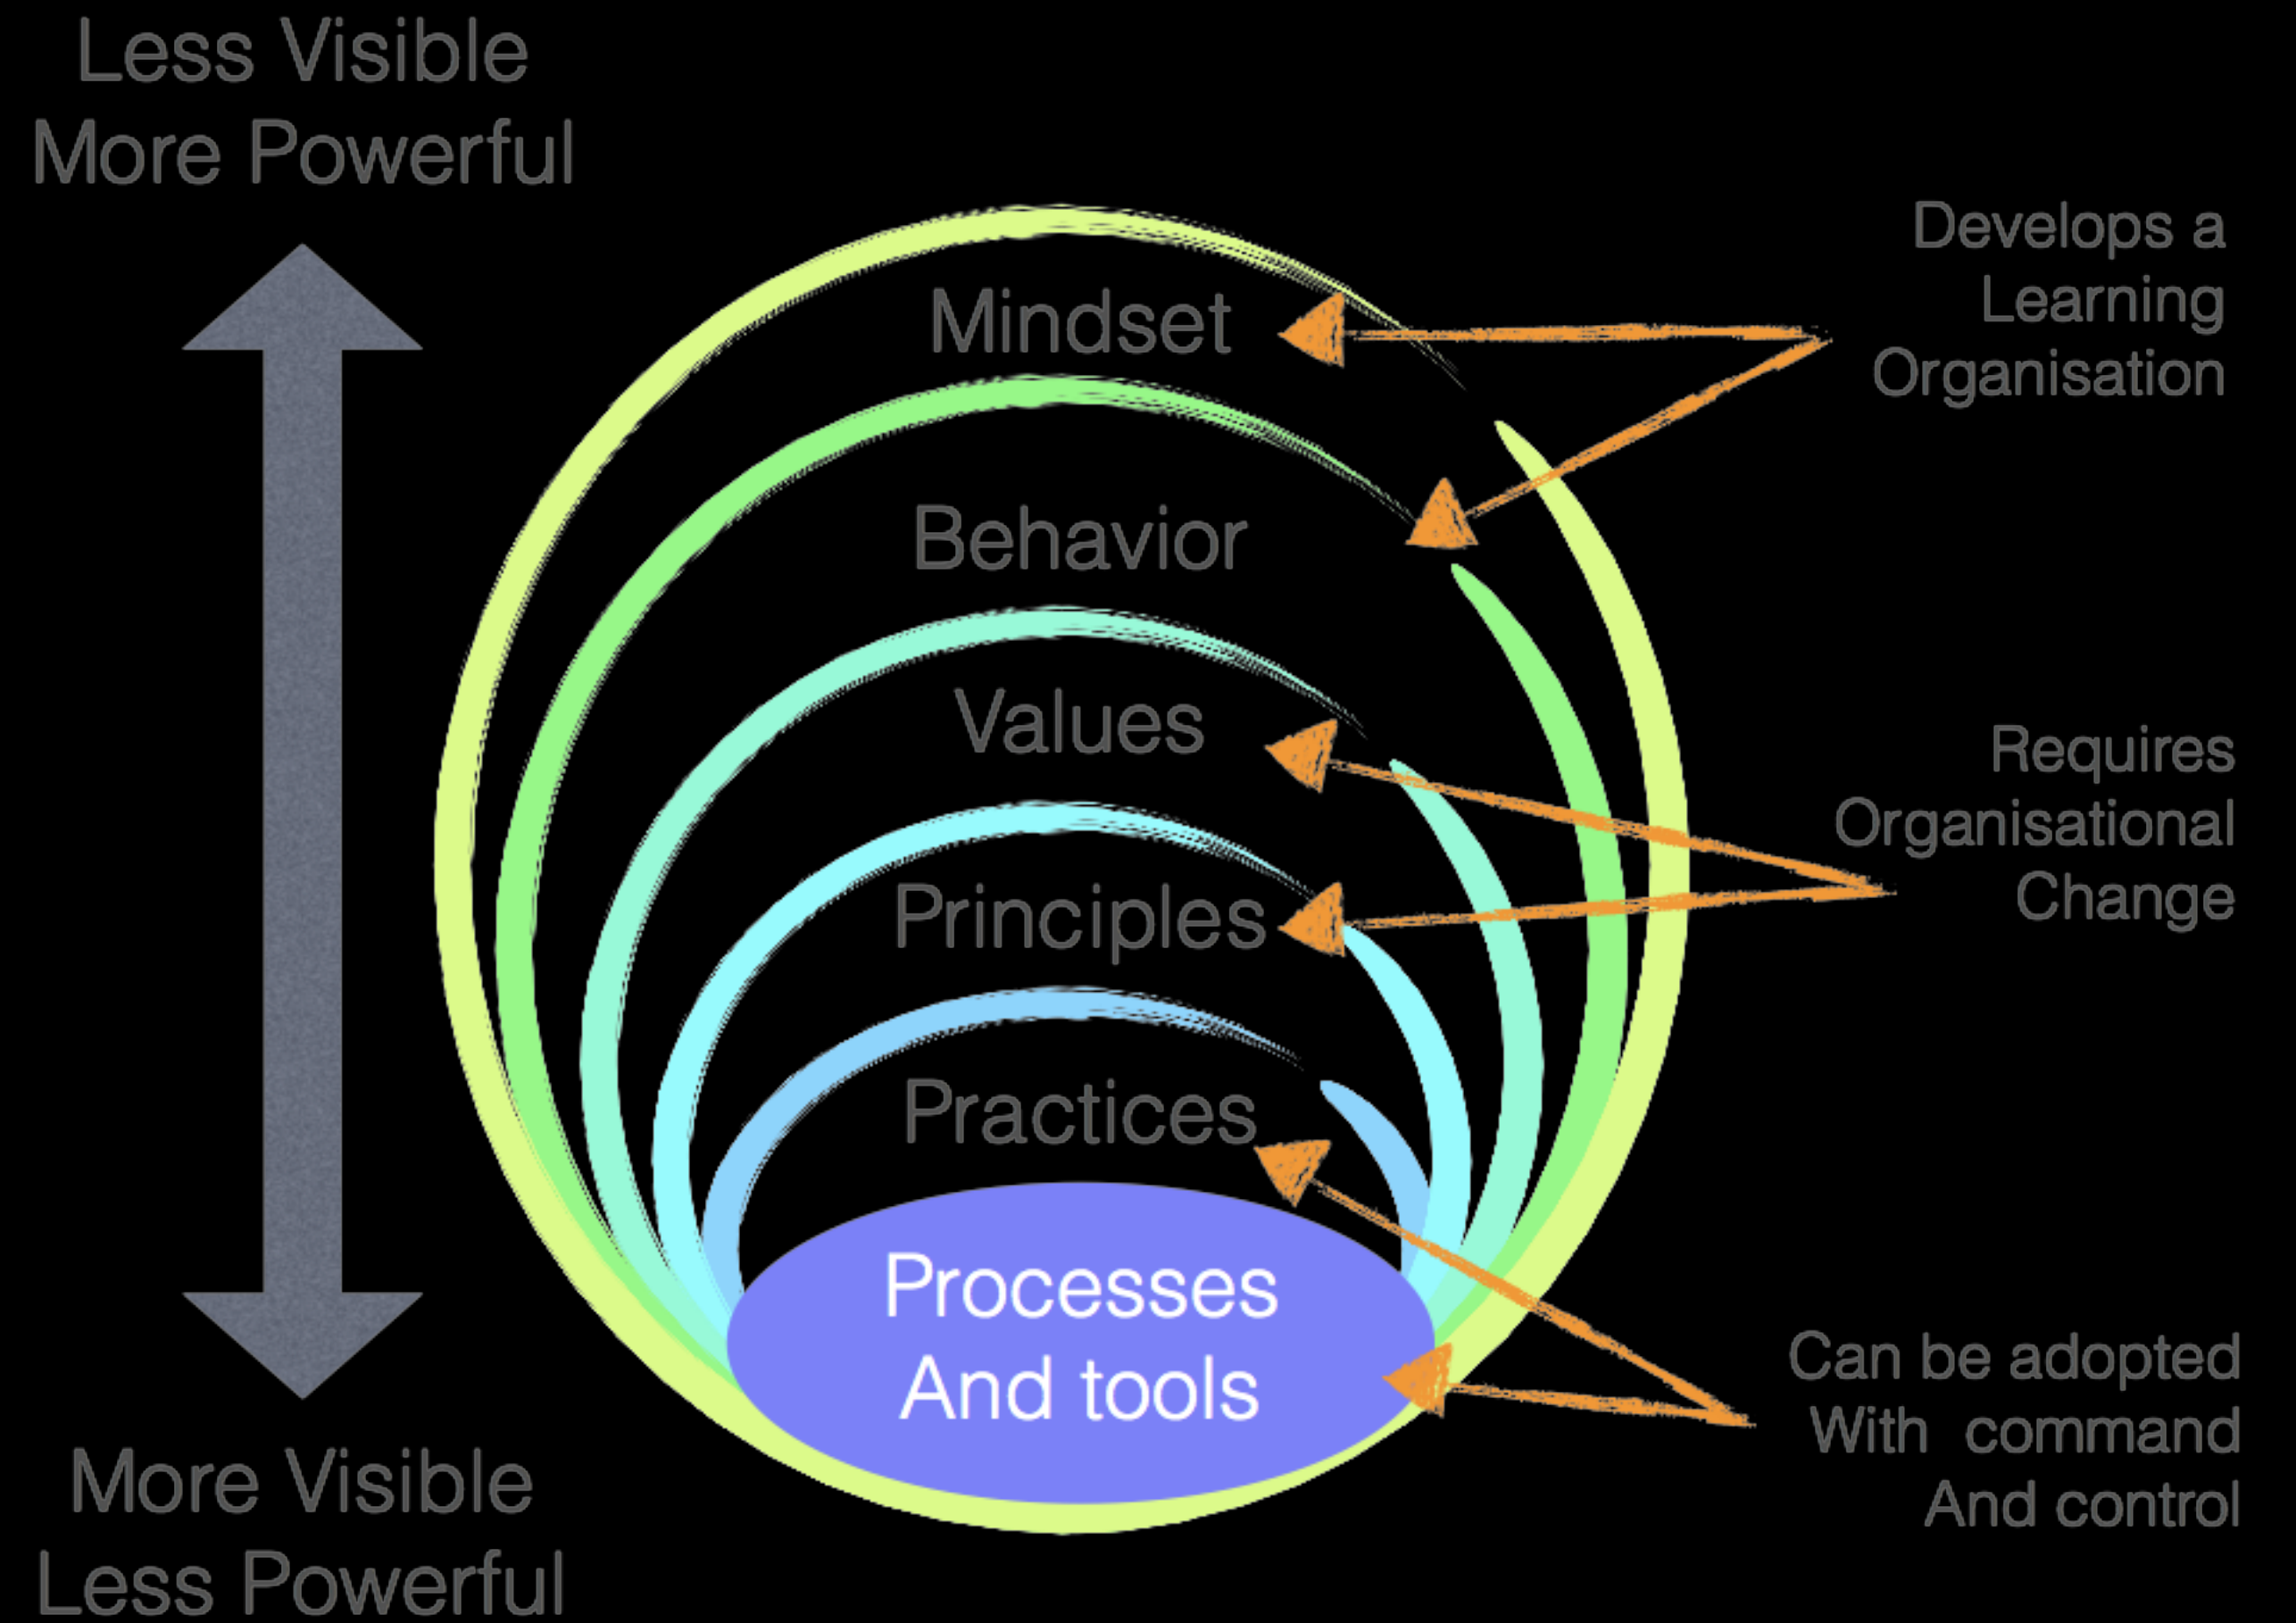

Development Levels

Lean Pyramid

HOSHIN KANRI EDITION

THE ALMIGHTY
MINDSET CHANGE

HYPE CYCLE

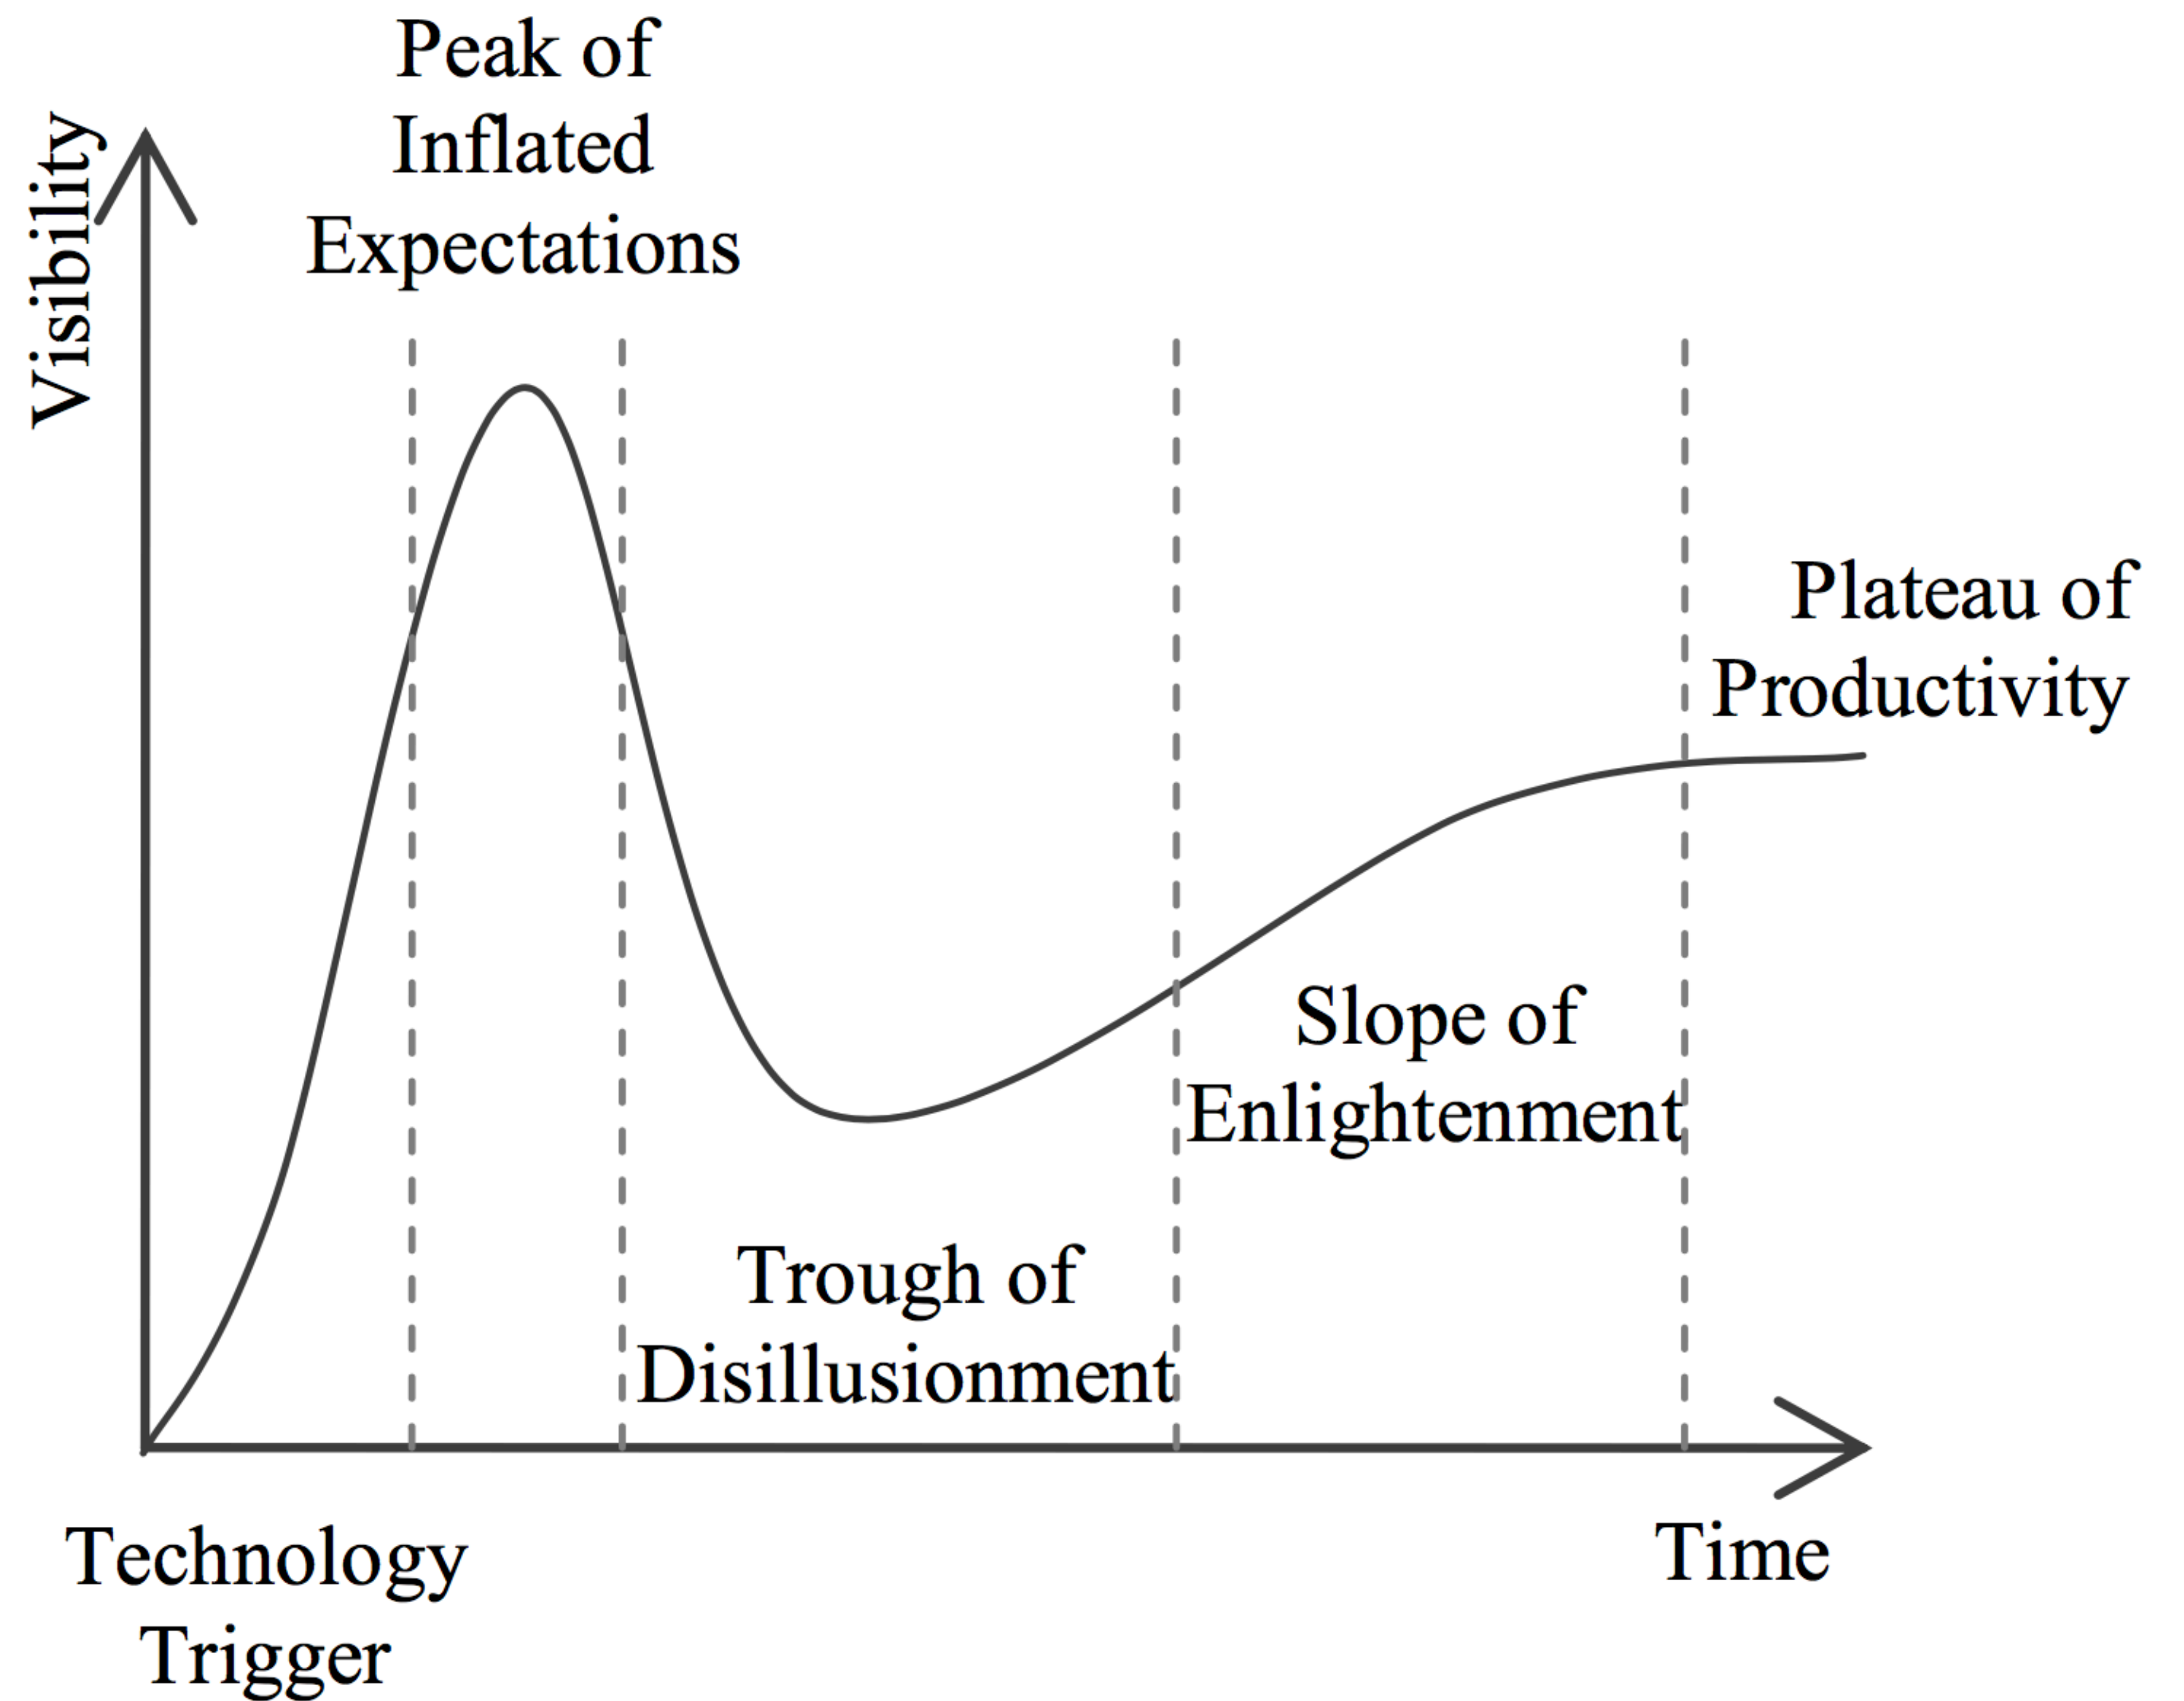

Figure 1. Gartner's Hype Cycle

HYPE CYCLE

APPLIED TO TRANSFORMATION

INTRODUCING THE IDEA OF
SAFE ZONES

STABLISH

PSYCHOLOGICAL SAFETY

Reflect and retrospect with your project community

Shorten feedback cycles

Inspect and Adapt relentlessly

Cultivate curiosity

Celebrate learning

ENHANCE

LEARNING AND INVENTION

Elaborate on continuous experimentation
Build, measure, learn!

Share whatever you've got:

Open spaces

Lean coffee

Hackatons

Dojo's

Meet-Ups

Tech-talks

VISUALISE AND
MANAGE THE FLOW

Map the value stream
Make the flow visual
Identify bottlenecks
Understand instrumentation
Study demand

OPEN SPACE

IN THE FLOW FOR IMPROVEMENTS

Eliminate or reduce Muda

INVENTORY / PARTIALLY DONE WORK
EXTRA PROCESSING /EXTRA PROCESSING
WAITING / DELAYS
OVERPRODUCTION / EXTRA FEATURES
TRANSPORTATION / HANDOFFS
MOTION / TASK SWITCHING
DEFECTS / DEFECTS

Reduce Muri (overload, Level demand)
Don't tolerate Mura (unevenness, defects)

IMPROVE

QUALITY TO EXCELLENCE

Jidoka - Automation with
a human touch

Automate repeatable activities:

- Infra structure provisioning
- Database migration
- Data quality analysis
- Data cleansing
- Code quality analysis
- Testing (Unit, Functional)
- Deployment
- System monitoring
- Crash recovery
- Self-service system support

SPEED UP
VALUE DELIVERY

Identify what value really is and how it's measured

Optimize batch sizes

Understand WIP

Understand the costs of storage versus transportation

Diminish transaction costs

ACHIEVE

PREDICTABLE DELIVERIES

Stabilise the flow

There is no predictability without stability

Develop basic stability

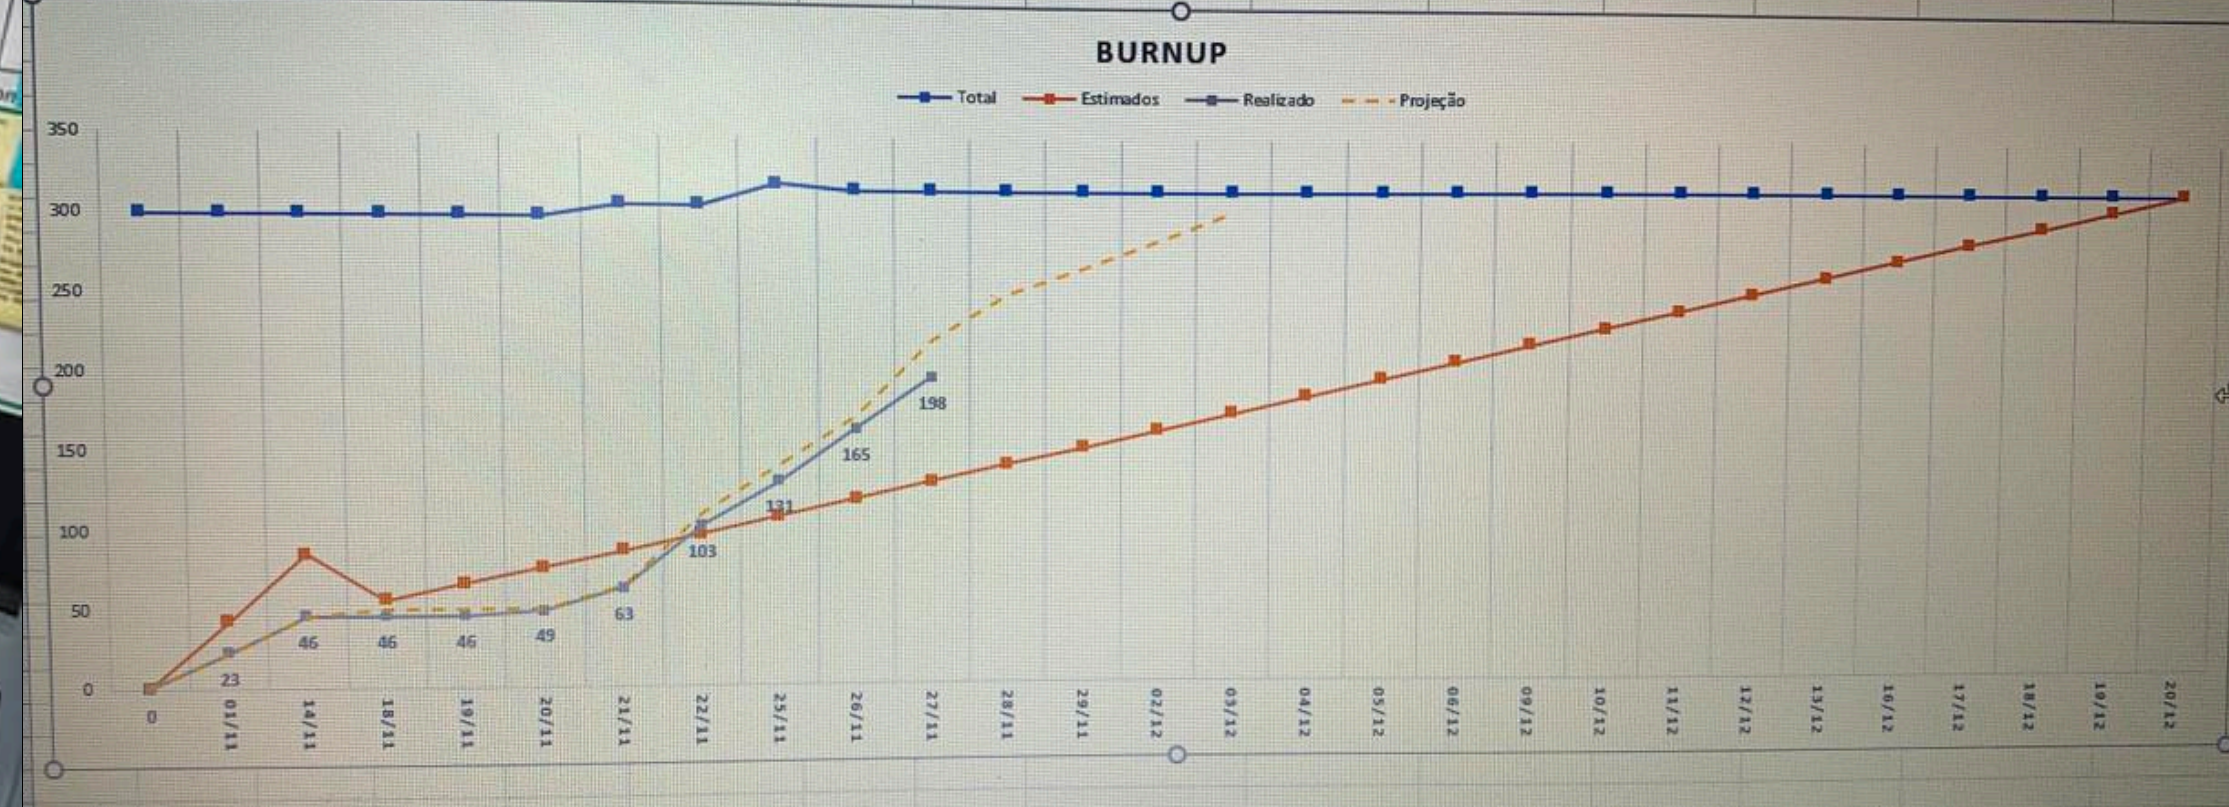

Understand capacity and availability

Understand and reduce variability

Ensure a steady rhythm

Measure flow statistics

Infer delivery dates based on throughput

SAFE ZONES

MOST IMPORTANT RULE

BE SAFE
AND ENJOY YOUR RIDE

Eric
Palmer
2012

THANK YOU!

@SCRESCENCIO
