

# HTML, CSS e JavaScript para criar aplicações Desktop Multi-Plataforma

@hmschreiner

@hmschreiner

@hmschreiner

# Desafios:

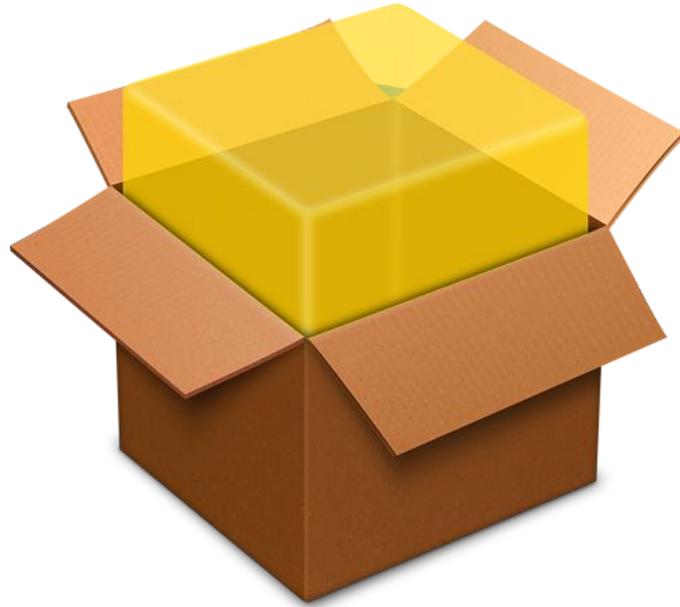

- Alinhar o design da aplicação de acordo com o sistema operacional
- Usar funcionalidades nativas como menus e notificações
- Uso de bibliotecas específicas para acesso à dispositivos e impressoras
- Gerenciar ferramentas e linguagens específicas para cada sistema operacional

Tecnologia Web

Código Aberto

Multiplataforma

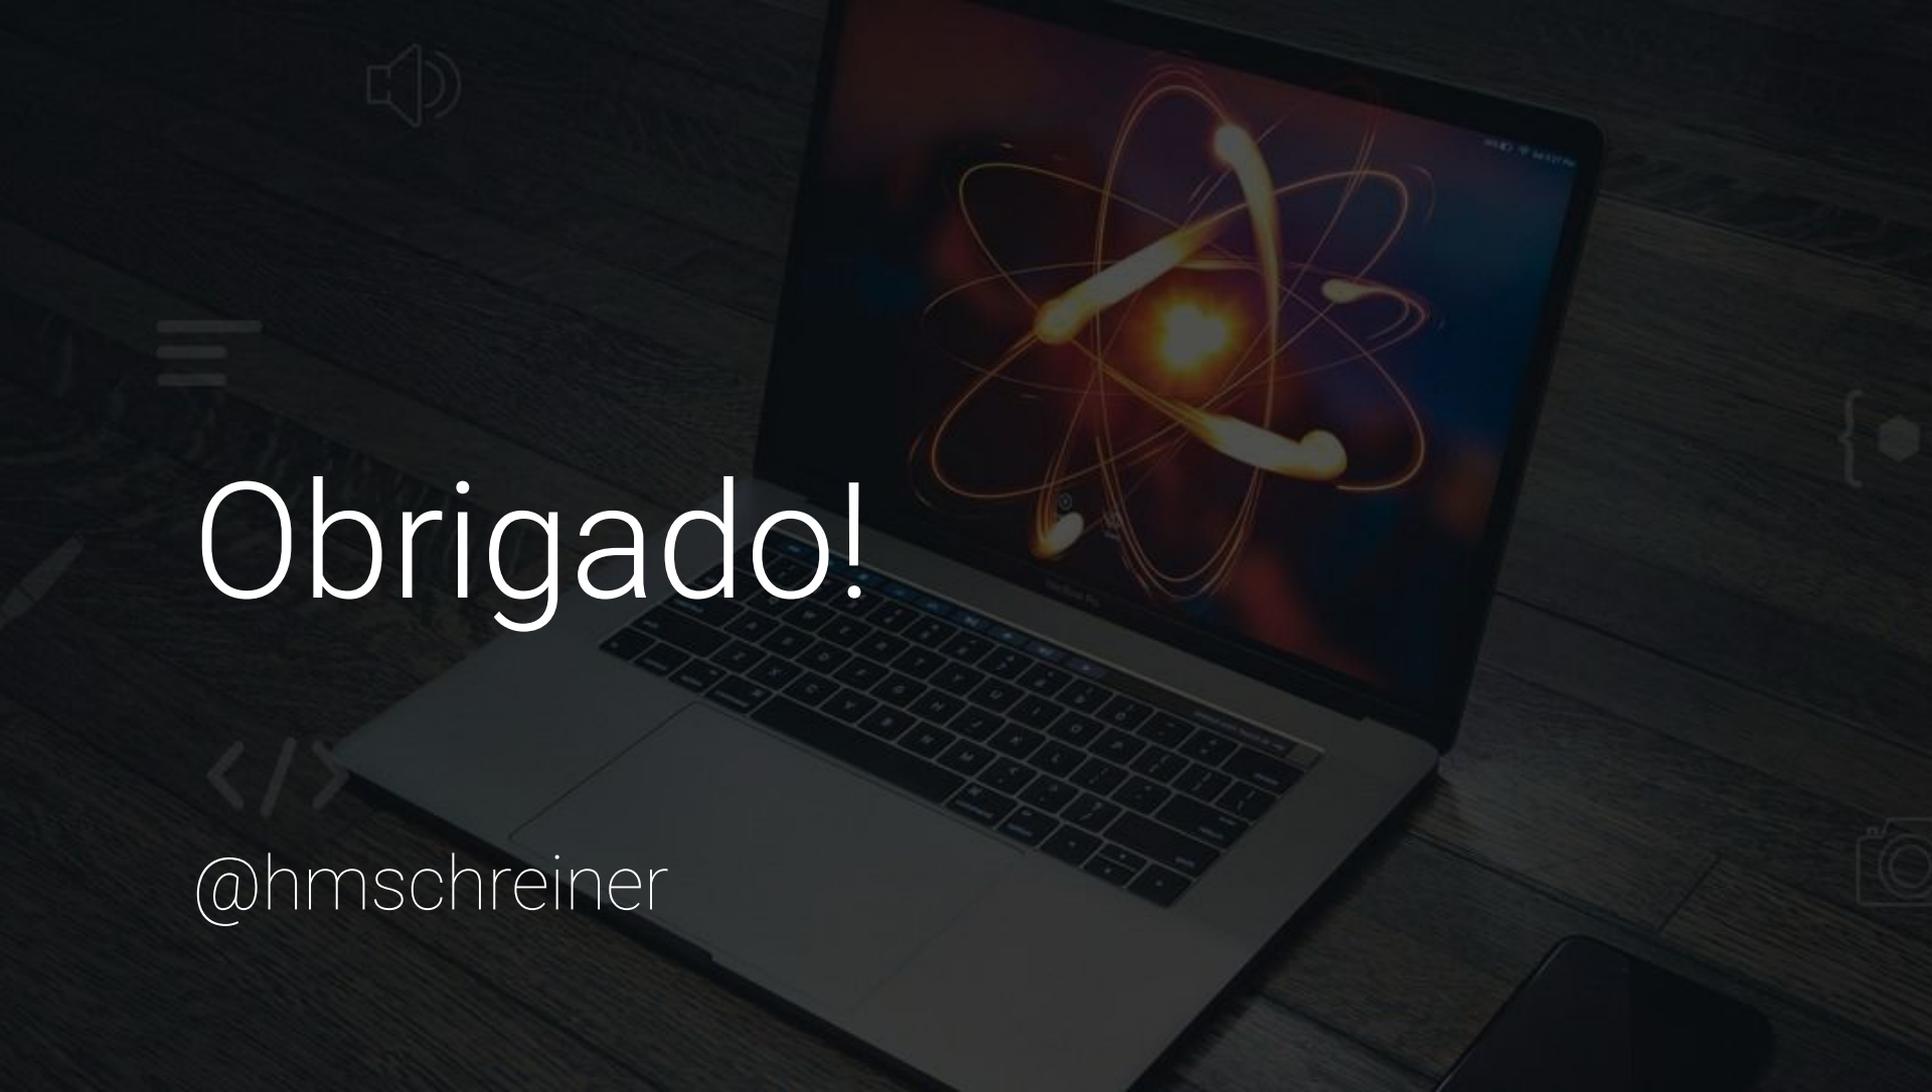

# Benefícios:

- Atualizações automáticas
- Notificações e menus nativos
- Relatório de falhas
- Depuração & criação de perfil
- Instaladores para Mac, Windows e Linux

A man with short, light-colored hair is sitting at a chessboard in a dimly lit room. He is looking intently at the board, with his hands positioned over the pieces. The room has a bookshelf in the background and a window with blinds on the left. The overall atmosphere is quiet and focused.

Demo

@hmschreiner

A laptop is open on a wooden desk. The screen displays a stylized atomic model with a bright yellow nucleus and several glowing orange elliptical orbits. The background is dark and semi-transparent, showing faint icons of a speaker, a hamburger menu, and a code symbol. The text 'Obrigado!' is overlaid in white on the left side of the laptop.

Obrigado!
